

Marketing Analysis

The single largest traffic source Google (~120K users), converts at the lowest rate among major named channels — while smaller channels like the Merchandise Store's own referral traffic convert 2-3x more efficiently.

Scatter chart: Google, the single largest traffic source (~120K users), converts at the lowest rate among major named channels — while smaller channels like the Merchandise Store's own referral traffic convert 2-3x more efficiently.

Funnel chart: The steepest drop happens immediately after the first view — 84.84% of users who view an item never add it to cart, and a second sharp loss occurs at checkout, where only 1.47% of all original viewers ultimately purchase.
